Y25 - 2026-2027 Trimester - 4

Project Abstract Submission Form

Sec No-	Team No-	Project Title - Hospital Management & Appointment Booking System
----------------	-----------------	---

- 1. Abstract - MediConnect is a hospital management and appointment booking system designed to make healthcare services easier to manage for patients, doctors, and hospital staff. The system brings important hospital activities such as patient registration, doctor management, appointment booking, medical records, prescriptions, billing, and department management into one platform.**
- 2. Patients can find doctors, check their availability, and book appointments, while doctors can manage their schedules and patient information. Hospital administrators can manage doctors, patients, appointments, and view basic hospital statistics from a centralized dashboard.**
- 3. The system will use a relational database and a backend API to store and manage information efficiently and securely. In the future, the platform can be extended with features such as smart appointment scheduling, notifications, online payments, AI-assisted healthcare navigation, and support for multiple hospitals.**

4. Team Details

Roll Number(s)	Name of the Student	Signature
2520090105	Tella Lokesh	
2520080027	Tejas Reddy	
2520090061	Guru Charan	

3. Frameworks / Platforms / Software Used

Main Objectives

- * Simplify hospital management.
- * Make appointment booking easy.
- * Manage patients, doctors, and medical records.
- * Reduce appointment conflicts and waiting time.
- * Provide a secure and organized database.

Technology Used

- * Frontend: HTML, CSS, JavaScript
- * Backend: Java, Spring Boot
- * Database: MySQL
- * API: REST API
- * Tools: Git, GitHub, Postman, VS Code
